Baggage

IATA defined baggage as articles effect and other personal belonging of passenger destined to be so worn or used by them.

Comfort and convenience during the journey.

Passenger baggage is transported in two ways

- ① Hand-carry baggage, which is also known as Cabin baggage & is carried by the passenger & stored in the aircraft cabin itself. This baggage is also known as hand baggage or carry on baggage.

The general accepted dimensions for carry on baggage are:-

Maximum length 55 cm (22 in)

Maximum width 45 cm (18 in)

• depth 25 cm (10 in)

these dimensions include wheels, handle & side

(b) : Checked Baggage

This is checked & registered at this check in counter & taken away to be stored by airport baggage handlers in the aircraft hold.

Aircraft hold is part of aircraft located in the aircraft under belly.

The airlines responsible for the transportation of checked baggage passenger baggage.

Free Baggage Allowance

Each passenger is given a specific free baggage allowance when he buys passenger ticket.
