

Roll No. ....

**24383**

**B. Tech 6th Semester (Civil)**

**Examination – May, 2016**

**ENGINEERING GEOLOGY**

**Paper : CE-312-F**

***Time : Three Hours ]***

***[ Maximum Marks : 100***

*Before answering the question, candidates should ensure that they have been supplied the correct and complete question paper. No complaint in this regard, will be entertained after examination.*

***Note : Attempt any five questions selecting first question as compulsory.***

**1. Attempt any five : 4 + 4 + 4 + 4 + 4**

- (a) Define geology.
- (b) Discuss role of GIS in geological exploration.
- (c) List the factors causing landslides.
- (d) Define intrusive and extrusive rocks.
- (e) What is soil profile ?
- (f) Define stratigraphy.
- (g) Define dip and strike.

24383-6250-(P-3)(Q-9)(16)

**P.T.O.**

2. (a) Give a general view of the internal structure of the Earth. 10
- (b) Discuss the importance of geological investigation in civil engineering practices. 10
3. (a) Write short note on weathering of rocks and its significance in engineering construction. 10
- (b) Explain briefly some major geological features produced by river erosion. 10
4. (a) What is a rock forming mineral? 5
- (b) Discuss the physical properties of minerals with examples. 15
5. (a) Define fold. Add a note on the engineering importance of folds. 12
- (b) What are broadly accepted causes of faulting of rocks? 8
6. Explain briefly the characteristics of a geological map. Describe how a geological section can be drawn across a geological map. 20

243836,250-(P-3)(Q-9)(16) (2)

7. (a) Discuss mode of occurrence and methods of flow of subsurface water. 10
- (b) Give an account of different methods used for exploration of ground water reserves. 10
8. What are general geological characteristics of the area that must be known before a tunnel project is decided in that area? 20
9. Give a general account of the stability condition of a slope. In what circumstances a particular part of a slope is likely to suffer a failure? 20

243836,250-(P-3)(Q-9)(16) (3)
