

B.Tech. (CSE)**Software Engineering – BTCS 603****Time: 3 Hours****M. Marks: 60**

NOTE: Section A is compulsory. Attempt any four questions from Section B. Attempt any two questions from Section C.

Section A

1. Answer the following in brief: 2 × 10 = 20
- Throw-away Prototyping
 - Evolution of software engineering
 - Modularity
 - Code Review
 - Verification and Validation
 - Static and Dynamic Analysis
 - GANTT Charts
 - Cost-time Relations
 - Non-functional Requirements
 - Issues in Software Design

Section B

- Why do we need to carry out feasibility study for any project? What type(s) of feasibility is more important? (05)
- Why do requirements gathering difficult? What types of tools are available for requirements gathering? (05)
- What features must be considered in designing user interface? Why is it so important? (05)
- How will you define design for testability? How good design helps in software testing? (05)
- What is cost estimation in software? What types of cost estimation model are available in software engineering? (05)

Section C

7. Consider the following narrative description; draw the Data Flow Diagrams for this description starting from zero level. If missing, consider suitable data to complete the description.

The purpose of the TEXTBOOK INVENTORY SYSTEM at a campus bookstore is to supply textbooks to students for classes at a local university. The university's academic departments submit initial data about courses, instructors, textbooks and projected enrollments to the bookstore on a TEXTBOOK MASTER LIST. The bookstore generates a FORM 17; PURCHASE ORDER, which is sent to publishing companies supplying textbooks. Book orders arrive at the bookstore accompanied by a PACKING SLIP, which is checked and verified by the receiving department. Students fill out a BOOK REQUEST FORM that includes course information. When they pay for their books the students are given a paper tape CASE REGISTER SALES RECEIPT. (10)

- What is black-box testing? Explain various techniques used in black-box testing with the help of suitable example. (10)
- Explain the difference between Six Sigma, ISO and SEI-CMMI approach for software quality. (10)
