The idea of a Robot Slave which would be capable of performing many of these monotonous chores is one that appeals to many. Already robots are used in mines & factories to perform tasks which are too risky for human beings. It takes a lot of research by dedicated scientists & sufficient financial backing for a model to be developed to perform a new task. This in turn depends on the number of people who feel the need for a robot to perform these specific tasks. A domestic robot slave with it's own computer response mechanism & source of power, which can be programmed to perform certain specific tasks is not an impossibility . I was late bloomer & always envied those people who stood out in high school because I didn't. I learned early on, although, that it's essential to set yourself from the group. Life is one struggle after one another to succeed, particularly when you are starting out. If your bio data is sitting at the bottom of a pile of junk mail, sometimes a distinctive approach will get you noticed, especially if the competition is fierce. My partner Jerry & I decided that we would write scripts for the minor character because that's what was needed & we needed to set ourselves apart.

In the first script, Jerry & I wrote a school - girl falls in love with a boy in her class. The producers loved the story. And with that one script, Jerry & I were no longer just another comedy writing team.

Even in the most primitive societies, the great majority of people satisfy a large part of their material needs by exchanging goods and services. Very few people indeed can make for themselves everything they need – all their food, their clothes, their housing, their tools. Ever since men started living in communities, they have been satisfying their needs by means of specialization & exchange; increasingly each individual has concentrated on what he can do best & has produced more of the special goods or services, in which he has concentrated, than he can consume himself. The surplus he has exchanged with other members of the community, acquiring in exchange the things he needs that others have produced.
