Roll No: $\square$

# B. TECH <br> (SEM III) THEORY EXAMINATION 2019-20 BASICS DATA STRUCTURE AND ALGORITHMS 

Time: 3 Hours
Total Marks: 100
Note1.AttempltSectiohfsequiaramis sidgtatheahooselitably.
SECTIOAN

1. Attemqlaquestiontsrief.
$2 \times 10=20$

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | What is primitive data type? | 2 | CO1 |
| b. | Define sparse matrix. | 2 | CO1 |
| c. | What is PUSH and POP operation. | 2 | CO2 |
| d. | What are two fields in Link list | 2 | CO2 |
| e. | What is Binary Tree? | 2 | CO3 |
| f. | What is AVL Tree. | 2 | CO3 |
| g. | Explain Adjacency list for any graph | 2 | CO4 |
| h. | Explain connected components | 2 | CO4 |
| i. | What is unstable sorting? | 2 | CO4 |
| j. | What is hoisting? | 2 | CO4 |

## SECTION B

2. Attempt any three of the following:
$\mathbf{3 \times 1 0}=\mathbf{3 0}$

| Qno. | Question | Marks | CO |
| :---: | :---: | :---: | :---: |
| a. | Explain asymptotic notations. Define Big-Oh notation and find the complexity of the following recursive function $T(n)=4 T(n / 2)+n \log n$ | 10 | CO1 |
| b. | Show the addition of given polynomials using linked list: $\mathrm{P}=3 \mathrm{X}^{\wedge} 2+2 \mathrm{X}+7 \mathrm{Q}=5 \mathrm{X}^{\wedge} 3 \wedge 2 \mathrm{X}^{\wedge} 2+\mathrm{X}$ | 10 | CO 2 |
| c. | What is binary searit tree? Make a binary search tree for following sequence: 871720236921522121 | 10 | CO3 |
| d. | Differentiate befiveen BFS and DFS with suitable example. | 10 | CO4 |
| e. | What is stab sorting? Explain quick sort in detail. | 10 | CO4 |

## SECTION C

3. Attempt any one part of the following:
$1 \times 10=10$

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :---: |
| a. | How do you find the complexity of an algorithm? What is the relation <br> between the time and space complexities of an algorithm? Justify your <br> answer with an example | 10 | CO1 |
| b. | Define queue. Explain various operations performed on queue with <br> suitable example | 10 | CO5 |

4. Attempt any one part of the following:
$1 \times 10=10$

| Qno. | Question | Marks | CO |
| :--- | :---: | :--- | :--- |
| a. | What is recursion? Write a C code to solve tower of Hanoi problem. | 10 | CO 2 |
| b. | Write an algorithm for conversion of infix to postfix expression. <br> Translate infix expression into its equivalent post fix expression: <br> A * $(\mathrm{B}+\mathrm{D}) / \mathrm{E}-\mathrm{F} *(\mathrm{G}+\mathrm{H} / \mathrm{I}()$ | 10 | CO 3 |

5. Attempt any one part of the following:
$1 \times 10=10$

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :---: |
| a. | Draw a binary tree which following traversal: <br> In order: DBHEAIF J CG <br> Preorder: ABDEHCFIJG | 10 | CO4 |
| b. | What is Threaded Binary Tree? Explain insertion and deletion <br> algorithms on threaded binary trees | 10 | CO4 |

6. Attempt any one part of the following:
$1 \times 10=10$

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :--- |
| a. | Differentiate between Prims and Kruskal Algorithms with example. | 10 | CO2 |
| b. | Write Short notes on: | 10 | CO 2 |
|  | i) | Walk |  |
|  | ii) | Path |  |
|  | iii | Topological sort |  |

7. Attempt any one part of the following:
$1 \times 10=10$

| Qno. | Question | Marks | CO |
| :--- | :--- | :--- | :---: |
| a. | Explain merge sort. Discuss its worst-case time complexity. | 10 | CO4 |
| b. | What is B-Tree? Differentiate between B-Tree \& B+Tree. | 10 | CO3 |
