Sub Code:MTEC-021 Roll No.

M.TECH (SEM I) THEORY EXAMINATION 2022-23 **OPTICAL COMMUNICATION**

Time: 3 Hours

Total Marks: 70

Note: Attempt all Sections. If require any missing data; then choose suitably.

SECTION A

Attempt all questions in brief. 1.

- Define IP. (a)
- What are the different types of semiconductor optical amplifier? (b)
- What is TDMA? (c)
- (d) Define storage area networks.
- (e) Define ATM.
- (f) Give the significance of Soliton.
- (g) Mention the advantages of optical fiber communication.

SECTION B

2. Attempt any three of the following:

- What is modulation? Explain the various types of modulation. (a)
- Using energy band diagram discuss the mechanism for the provision of stimulated (b) emission in the erbium doped silica fiber amplifier (EDFA).
- Explain the principle of WDM with a neat block diagram. (c)
- (d) Explain the working of SONET/SDH with a neat diagram. Give its applications.
- Explain nonlinear effects of soliton systems. (e)

SECTION C

3. Attempt any *one* part of the following:

- What are the various demodulation schemes used in optical communication? (a)
- Explain Coherent optical fiber Systems with diagram. (b)

4. Attempt any one part of the following:

- Explain the construction and working of Raman amplifier. (a)
- (b) Explain the process of digital transmission with high power fiber amplifiers.
- 5. Attempt any one part of the following: $7 \ge 1 = 7$
 - (a) What do you mean by CDMA? Why CDMA is called spread spectrum?
 - Discuss the various multiple access schemes in Optical Communication Systems. (b)
- 6. Attempt any one part of the following: $7 \ge 1 = 7$
 - Explain the network architecture of ATM. (a)
 - Explain wavelength routing network. (b)
- 7. Attempt any one part of the following: $7 \ge 1 = 7$
 - What is Soliton? How it is used in WDM systems to manage the impairments? (a)

Download all NOTES and PAPERS at StudentSuvidha.com

 $7 \ge 3 = 21$

 $2 \ge 7 = 14$

 $7 \times 1 = 7$

 $7 \ge 1 = 7$

(b) Explain Next generation optical Internets.
