Code No: 154BR JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD B. Tech II Year II Semester Examinations, April/May - 2023 OPERATING SYSTEMS (Common to CSE, IT, CSBS, CSIT, ITE, CE(SE), CSE(CS), CSE(AI&ML), CSE(DS), CSE(IOT), CSE(N))

Time: 3 Hours

Max. Marks: 75

Note: i) Question paper consists of Part A, Part B.

- ii) Part A is compulsory, which carries 25 marks. In Part A, answer all questions.
- iii) In Part B, Answer any one question from each unit. Each question carries 10 marks and may have a, b as sub questions.

PART – A

		(25 Marks)
1.a)	Define the essential properties of parallel operating systems.	[2]
b)	How does multiprogramming increase CPU utilization?	[3]
c)	Write about wait command.	[2]
d)	How does priority scheduling differ from round robin method?	[3]
e)	What is a message queues?	[2]
f)	Give an example of the situation describing deadlock.	[3]
g)	Define segmentation.	[2]
h)	What is the purpose of paging the page tables?	[3]
i)	What is a file?	[2]
j)	List down various file attributes.	[3]
	fur of	
	PART – B	

(50 Marks)

- 2.a) In a multiprogramming and time-sharing environment, several users share the system simultaneously. This situation can result in various security problems. What are two such problems?
 - b) Can we ensure the same degree of security in a time-shared machine as in a dedicated machine? Explain your answer. [5+5]

OR

- 3.a) Under what circumstances would a user be better off using a timesharing system rather than a PC or single-user workstation.
 - b) Distinguish between the client–server and peer-to-peer models of distributed systems.

[5+5]

- 4.a) Describe the differences among short-term, medium-term, and long-term scheduling.
- b) Can a multithreaded solution using multiple user-level threads achieve better performance on a multiprocessor system than on a single-processor system? [5+5] OR
- 5.a) Describe the actions taken by a thread library to context switch between user-level threads.
 - b) Why is it important for the scheduler to distinguish I/O-bound programs from CPUbound programs? [5+5]

Download all NOTES and PAPERS at StudentSuvidha.com

- 6.a) Demonstrate that monitors and semaphores are equivalent as they can be used to implement the same types of synchronization problems.
- b) What is critical-section problem? Give a classic Peterson's solution to the criticalsection problem. [5+5]

OR

- 7. Discuss the tradeoff between fairness and throughput of operations in the readerswriters problem. Propose a method for solving the readers-writers problem without causing starvation. [10]
- Given five memory partitions of 100 KB, 500 KB, 200 KB, 300 KB, and 600 KB (in order), how would each of the first-fit, best-fit, and worst-fit algorithms place processes of 212 KB, 417 KB, 112 KB, and 426 KB (in order)? Which algorithm makes the most efficient use of memory? [10]

OR

- 9. Explain the concept of Least Recently Used memory page replacement method and how it is different from First In First Out (FIFO) page replacement method. [10]
- 10.a) What are the advantages of Contiguous allocation? What are the drawbacks of contiguous allocation of disk space?
 - b) Explain the following commands: lseek, stat, ioctl. [4+6]
- 11. Explain in detail about the common schemes for defining the logical structure of a directory. [10]
