Code No: 155AM JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD B. Tech III Year I Semester Examinations, January/February - 2023 COMPUTER GRAPHICS (Common to CSE, IT, CSIT, CSE(AIML), CSE(DS))

Time: 3 Hours

Max. Marks: 75

(25 Marks)

Note: i) Question paper consists of Part A, Part B.

- ii) Part A is compulsory, which carries 25 marks. In Part A, Answer all questions.
- iii) In Part B, Answer any one question from each unit. Each question carries 10 marks and may have a, b as sub questions.

PART – A

1.a)	Explain applications for large screen displays.	[2]
b)	Write a short note on video-display device.	[3]
c)	What is viewing functions?	[2]
d)	Explain the 2 D transformation matrix for Translation	[3]
e)	What is the role of parametric functions in curve generation?	[2]
f)	Write an algorithm for the generation of B-spline?	[3]
g)	Derive the transformation matrix for rotation about y-axis in 3D.	[2]
h)	Derive the matrix form for the Translation operation in 3-D graphics.	[3]
i)	Write about depth-sort algorithm.	[2]
j)	What are the steps in design of animation sequence?	[3]
	PART – B	
	Moatt C	(50 Marks)
2.a)	What are the pers involved in DDA algorithm for line drawing.	
b)	Write a short note on boundary-fill algorithm.	[5+5]
,	OR	
3.a)	Briefly explain about mid-point ellipse algorithms with example.	
b)	Discuss about raster-scan systems.	[5+5]
4.a)	Describe the Cohen-Sutherland algorithm.	
b)	What is reflection? Discuss with example?	[5+5]
	OR	
5.a)	Explain the stages in viewing pipeline in 2-D graphics.	
b)	Derive mathematically the transformation that rotates an object point 0 0 about the origin. What the matrix representation for this rotation.	anti-clockwise [5+5]
6 a)	Write a short note on Hermite curve	
b)	Discuss about quadric surfaces	[5+5]
0)	OR	
7.a)	Write a short note on Bezier curve.	
b)	Discuss about polygon rendering methods.	[5+5]
- /	1 - 7 0 0	L

Download all NOTES and PAPERS at StudentSuvidha.com

8.a) b)	Derive the matrix form for Rotation in 3-D graphics. Explain about the approaches followed for clipping in 3-D space.	[5+5]
9.a) b)	Briefly explain about 3-D composite transformations. Write a short note on shear transformations in 3-D.	[5+5]
10.a) b)	Discuss about the graphical languages followed to achieve animation. Explain in detail about depth-buffer algorithm. OR	[5+5]
11.a) b)	Describe linear list notation of animation languages. Write a short note on BSP-trees.	[5+5]
