- 6.a) Analyze and suggest an appropriate layout for a Pump manufacturing unit for local market and for an apparel shop in a posh area of Hyderabad and justify your answer.
b) An organization has warehouses for oxygen cylinders for medical uses at five different locations whose coordinates are given in the following table. The organization is in the process of locating one more critical central warehouse which will distribute drugs to all the existing warehouses on emergency request. Find the location of the new warehouse. Existing warehouse number Coordinates of Centroids. [7+8]

A	150, 100
B	200, 120
C	400, 300
D	220, 250
E	100, 180

- 7.a) The following table gives the number of defects in a casting unit. Construct a C-chart with 3 sigma limits and comment on the casting process.

Casting no	1	2	3	4	5	6	7
Number of defects	13	16	22	11	9	23	14

- b) Explain the working principle of double sampling plan with a flow chart. [8+7]

- 8.a) Differentiate between CPM and PERT analysis.

- b) The following represents a project that should be scheduled using PERT.

Activity	Immediate predecessor	Optimistic time	most likely time	Pessimistic time
a	-	11	22	24
b	a	5	5	12
b	a	6	14	18
c	b	1	2	3

- i) Draw the network
 ii) What is critical path & the expected project completion time?
 iii) What is the probability of completing this project within 35 days?

[7+8]
